- Participants, kindly ensure your microphone is muted and your video is turned off.
- Please speak only when the moderator indicates it's your turn to do so.
- Utilize the chat feature to submit any questions you wish to ask.

Preface

The Center for Emerging Technologies for Sustainable Development (CETSD) and Unnat Bharat Abhiyan (UBA), IIT Jodhpur proudly resumes its **ETSD Seminar Series**, initiating a fresh dialogue centered on the critical domain of ***Public Health***. As we embark on this renewed journey, our aim remains steadfast: to catalyze interdisciplinary discourse and actionable insights in pursuit of sustainable development goals (SDGs).

The chosen theme for our new seminar series on health aligns seamlessly with the World Health Organization's (WHO) directive for World Health Day 2024 – "My Health, My Right." **Dr. Pankaja Raghav**, a distinguished authority in the field, shall deliver a keynote address titled "*Achieving Health Rights for Sustainable Development of Communities*." Drawing from her extensive expertise as Professor and Head of the Department of Family & Community Medicine at AIIMS, Jodhpur, Dr. Raghav will elucidate the imperative of safeguarding health as a fundamental human right within the context of sustainable community development.

Possible questions that could be explored during the seminar:

- How can we ensure universal access to healthcare services, regardless of socio-economic status or geographic location?
- What governmental policies and international frameworks are essential for promoting health rights and sustainable development within communities?
- In what ways can healthcare systems prioritize preventive measures and community-based interventions to ensure long-term population health and well-being?

Schedule of the Event

Details	Time	Title of the Talk	Speaker	Affiliation	UN SDG Goals impacted

About the Speaker

Dr. Pankaja Raghav, a distinguished figure in the field of Public Health, serves as the Professor & Head at the Department of Community Medicine & Family Medicine, AIIMS Jodhpur. With a formidable academic background, Dr. Raghav brings over three decades of experience in Public Health. With over 100 research publications in reputable journals and 11 Extramural funded projects as Principal Investigator, Dr. Raghav is a prolific contributor to the advancement of medical knowledge. Dr. Raghav's expertise spans a wide spectrum, including Epidemiology, Public Health, Vaccines, Occupational Health & Environmental Health, Non-communicable & Communicable diseases, Health Systems Research, Health Economics, Reproductive and Child Health, Geriatrics, Climate Change, and Vector-Borne Diseases. Dr. Raghav's dedication to promoting health equity and addressing pressing public health challenges makes her an invaluable addition to the upcoming World Health Day seminar. Her insights and expertise are sure to enrich discussions on the theme "My Health, My Right," inspiring actionable strategies for improving healthcare access and outcomes in communities.
